FACT FLUENCY

Editable parent letter explaining fact fluency program

PARENT INFORMATION

Dear Parents,

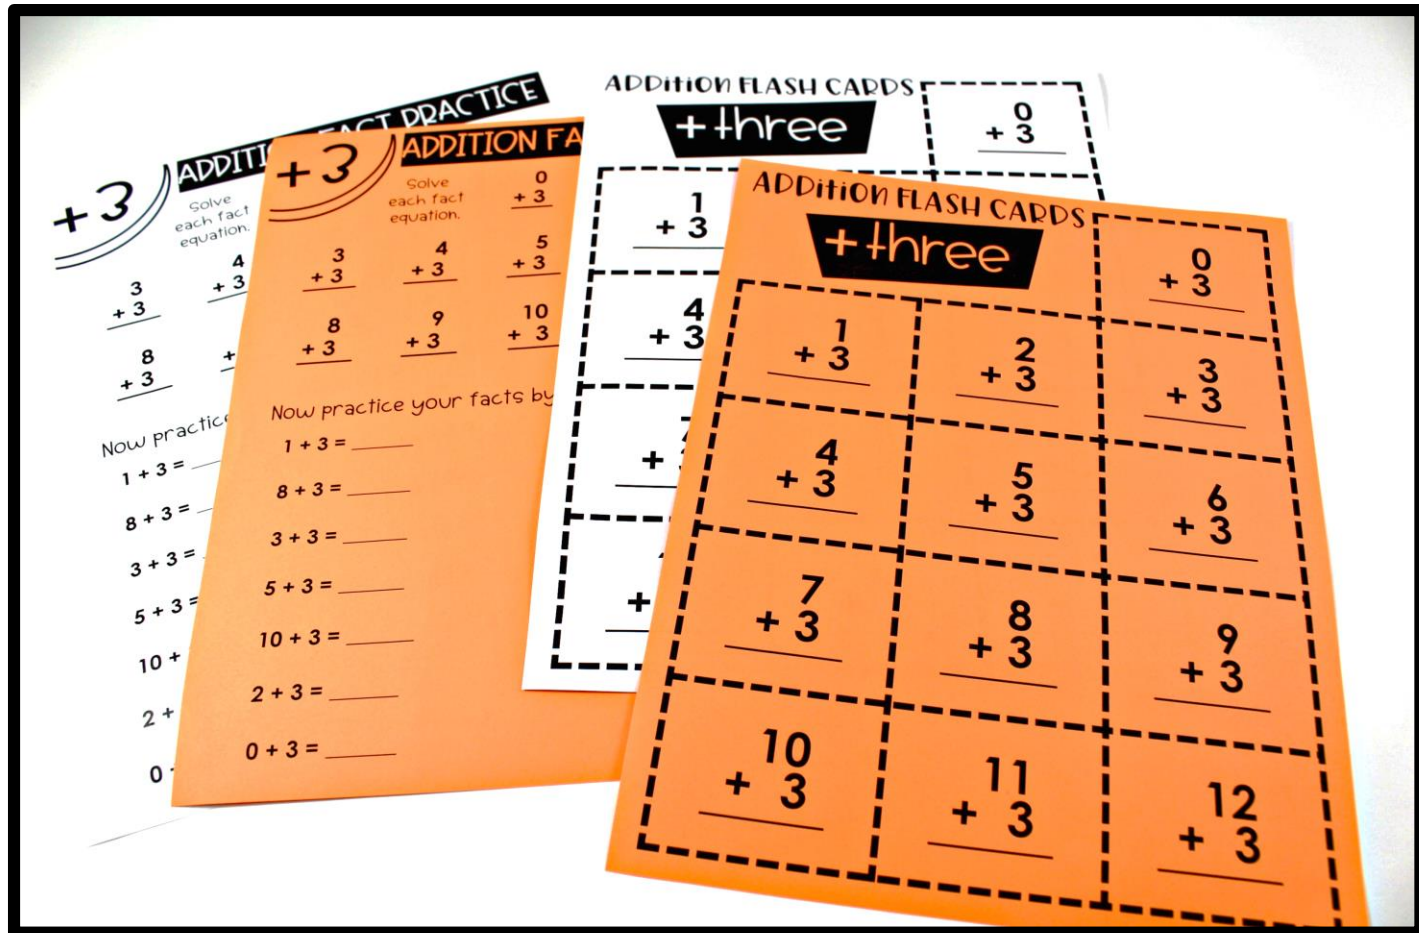

It's the time of year where students need to start mastering their basic 0-12 facts for addition and subtraction. At school, students will be exposed to the facts and have time to practice. Each week, students will have a quiz over their facts, starting with the 0s and moving up to 12.

Students will learn and master their addition facts, then move on to their subtraction.

I will send home flash cards for each fact next week. I encourage students to practice the flash cards each night, and students may even move to the next number if they are ready.

Please let me know if you have any questions.
Thank you for your support at home!

Sincerely,
(INSERT TEACHER NAME)

ADDITION PRACTICE

Color code the addition practice pages with the addition flash cards, or leave them black and white. Allow opportunities for students to practice in many ways to gain fluency.
